Subject: Fatal collision A137 Tattingstone

Dear all,

following a fatal road collision on 26 August 2020 the Assistant Coroner, Tim Deeming, issued a Regulation 28 Report to Suffolk County Council Highways in which he recommended action be taken in order to mitigate the risks of future collisions. Particular reference was made to the vertical alignment of the road and the presence of a hidden dip. Please see maps and photo's below.

For your information SCC Highways has assessed the Report and agreed to install a pair of hidden dip signs north of the Wallers Farm access, facing southbound traffic.

Work will now proceed to design suitable locations, leading to the erection of new posts and signs in due course.

Figure 1 – Area map

Figure 2 – Local map

The collision scene was located approximately 20 metres south of the driveway leading to 'Nine Oaks' and extended southwards for a further 70 metres (Figures 3 and 4).
